SUMMARY

Systems Analyst holding a degree in Information Systems, with hands-on experience building user interfaces using Angular, JavaScript, TypeScript, Node.js, and Python. Contributed to the migration of a legacy system to Angular integrated with REST APIs, successfully delivered on schedule. Proficient with React, Tailwind CSS, and shadcn/ui across personal projects, leveraging Git for daily version control workflows. Seeking an opportunity to deepen technical expertise, grow professionally, and actively contribute to the company's success.

WORK EXPERIENCE

Frontend Developer — Izio&Co | Jan 2023 – Aug 2023

Retail Management System (Customer & Merchant Portals) | Angular, TypeScript, Scrum, Postman, Git, GitLab, Jira

- Implemented bug fixes and minor features for Angular front-end applications.
- Performed ongoing feature updates and maintenance on legacy systems, collaborating with the technical support team to prioritize user demands.

Frontend Developer — Smartscan | May 2022 – Dec 2022

Logistics Management System | Angular, TypeScript, Git, GitHub, Kanban

- Redesigned logistics management modules to enhance user experience, maintain existing functionality, and collaborate directly with the technical team and internal stakeholders.
- Contributed to the maintenance and evolution of internal systems with a strong focus on scalability.

Software Development Intern — B2ml | Jul 2021 – Jan 2022

Learning Management System / LMS | Angular, React, TypeScript, Git, GitHub

- Implemented features for web applications utilizing frameworks such as Angular and React.
- Executed rapid bug fixes and performance optimizations across production environments.
- Participated in sprint planning and technical review meetings with the engineering team.

Junior Software Developer — Sigpharma | Feb 2020 – Feb 2021

Pharmacy Management System | Angular, Node.js, MySQL, REST APIs, Docker, Kanban, Git, GitHub

- Started as a Software Development Intern and was promoted to Junior Developer within 5 months, successfully remaining on the core team following a departmental restructuring.
- Contributed to the migration of legacy systems to a modern tech stack, focusing on Angular front-end development and supporting the back end with Node.js and MySQL, including API maintenance and relational database integration.
- Assisted in component architecture design, code refactoring, and technical documentation.

EDUCATION

Associate Degree in Data Science — Universidade de Franca (Unifran) | Aug 2026 – Present

Uberaba, MG - EAD | Python, Prompt Engineering, Machine Learning, Agentic AI

Residency in Microelectronics — CI Inovador, UFRGS Hub (Softex/MCTI) | Oct 2024 – Apr 2025

Porto Alegre, RS | National semiconductor training program, Neural Networks, Python, C, and RISC-V

- Postgraduate Certificate in Innovation, Management, and Entrepreneurship in Digital Microelectronics, followed by a hands-on residency awarded via selective process among top program graduates.

Bachelor's in Information Systems — Universidade de Uberaba (Uniube) | Aug 2017 – Aug 2024

Uberaba, MG | Software Development, Agile Methodologies, HTML, CSS, JavaScript, MySQL, Java, Project Management

CERTIFICATIONS & TRAINING

Santander Digital Immersion — AI Specialist Track | Apr 2026 – Jun 2026

(107 hours) | Python, Prompt Engineering, Agentic AI

TECHNICAL SKILLS

Frontend: Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui

Backend: Python, Java, Spring boot, Node.js

Integração e dados: APIs REST, PostgreSQL, MySQL, Lógica de programação

Tools: Git, GitHub, Jira, VS Code, Linux, Docker, Agentic AI (Claude, Cursor)

SOFT SKILLS

Quick Learner, Analytical Thinking, Teamwork, Problem Solving

LANGUAGES

Portuguese (Native), English (C1), Spanish (A2), Korean (A2)

PROJECTS

Applied Research Mission — UC3M (Spain) | Sep 2025 – Nov 2025

Two-month international academic mission at UC3M, conducting applied research in RISC-V architecture.

- Mentored by local faculty in computer architecture and RISC-V instruction set design.
- Participated in workshops on technological innovation and product development.
- Collaborated with international researchers and students, strengthening technical communication skills in English and Spanish.

Microelectronics Startup Simulation — Postgraduate Capstone Project | May 2025 – Sep 2025

Ci Inovador Program phase focused on building a market-ready product | Python, RISC-V, C, Project Management

- Collaborated within a multidisciplinary engineering team to develop a System-on-Chip (SoC) featuring a RISC-V core and an AI hardware accelerator for computer vision.
- Formulated the product proposal, conducted technical feasibility validation, and delivered investor pitch presentations.
- Attended weekly mentoring sessions with industry leaders and semiconductor executives.

EXTRACURRICULAR

Community Evangelist & Contributor — He4rt Developers | Apr 2026 – Present

One of Brazil's largest tech communities | Networking, Teamwork, Communication

STAFF & Contributor — ConexãoTI | Aug 2026 – Present

Tech community focused on mentoring career starters | Networking, Teamwork, Communication
